

Dear Mr. Powell and Members of the FCC,
I am a proud subscriber to XM radio having 2 radios'. I am very pleased with the innovative and cutting edge nature of their programs. I recently traveled to Florida and was able to get weather and driving conditions for both ends of my trip, coming to Florida and returning to my home. This was facilitated by the new Local Traffic and Weather Service offered by XM. I find it hard to believe that anyone has a difficulty with this service as it is provided at no additional charge and is very accurate.

I purchased a new vehicle recently because it has the ability to have XM radio, Please do not make this service less valuable to those of us who use it because of the concerns of the past.

Peace,

Fr. Bill Kessler
